

Patron Estimated Carded Activity for 2021

As you requested, set forth below is your gaming history statement for the year ending December 31, 2021. This is an estimated summary of your rated play gaming history at Rivers Casino in Philadelphia, Pennsylvania. Rated play is defined as total gaming play generated when using your Rush Rewards card. In other words, the only play that is included in this statement is play that occurred when you Rush Rewards card was properly inserted into the slot machine or a manual rating was created at a table game.

This statement shows your net win / loss for play involving use of your Rush Rewards card. A positive number indicates that winnings are greater than losses, and a negative number (in parenthesis) indicates losses are greater than winnings.

Please note that the Rush Rewards player rating system is not intended for tax reporting; therefore Rivers Casino makes no representation as to either the accuracy of this information or its effectiveness as proof of losses. Furthermore, this amount may not include all hand-paid jackpots reportable to the IRS on form W2G. The IRS recommends keeping a diary of your gaming activity with pertinent information such as dates, slot machine or table numbers, jackpots, and total wins and losses. For specific information on tax return preparation and IRS requirements, please consult a tax advisor or the IRS at www.irs.gov.

If you would like additional information or have any questions, please call us at 215-717-3896. Thank you for visiting Rivers Casino. Gambling Problem? Call 1.800.Gambler
