Performance data shown represents past performance and is no guarantee of future results. Investment return and principal value will fluctuate, so investors may have a gain or loss when shares are sold. Current performance may be higher or lower than what is quoted, and investors should visit [Fidelity.com/performance](#) for most recent month-end performance.

Important information about [investment advice](#) for retirement accounts.

ETFs are subject to market fluctuation and the risks of their underlying investments. Unlike mutual funds, ETF shares are bought and sold at market price, which may be higher or lower than their NAV, and are not individually redeemed from the fund.

Options trading entails significant risk and is not appropriate for all investors. Certain complex options strategies carry additional risk. Before trading options, please read [Characteristics and Risks of Standardized Options](#). Supporting documentation for any claims, if applicable, will be furnished upon request.

Before investing in any exchange-traded fund, you should consider its investment objectives, risks, charges, and expenses. Contact Fidelity for a prospectus, offering a circular or, if available, a summary prospectus containing this information. Read it carefully.
