¹ Contributions received within 3 business days of the end of a statement period will be reflected as a contribution however, since the contributions may not have been invested, current holdings may not reflect that investment.

² Represents net amount invested in each fund. The cost basis is increased by contributions and decreased by distributions. A portion of distributions taken represent realized gains or losses, which are not reflected in the cost basis.

³ Internal Transfers include changes in investment options, internal rollovers among Virginia529 programs and transfers (Invest529 to Invest529).

⁴ Investment Performance is a measurement of each portfolio's performance for the statement period (or portion thereof during which you were invested), which takes into account your investment activity. Performance is calculated using the Modified Dietz methodology. Other methods may yield different results.
