Annualized Personal Rate of Return (as of 12/31/2023)

A note about performance. Your personal performance is based on the performance of your investments and on the timing and amount of your purchases and redemptions. Therefore, your personal performance may differ - perhaps greatly - from the performance of the investments themselves.

Calculation method. Personal performance uses a formula called internal rate of return (IRR), which is a dollar-weighted return. IRR takes into account new money coming into your investment, as well as how long that money has been held. Don't confuse your personal rate of return with those posted for funds and indexes. The returns presented in these instances use a time-weighted calculation, which does not take cash flow into consideration.

Past performance. Past performance is not a guarantee of future performance. (Note, assets in the Principal Plus Interest Portfolio are allocated to a Funding Agreement issued by TIAA-CREF Life and guaranteed to the Wisconsin College Savings Program Trust, which is the policy holder under the agreement. You should monitor your personal performance over an extended period of time and consider other factors - investment objectives, time horizon, risk tolerance, personal financial situation, and tax implications - before making changes to your portfolio. Performance presented is for applicable time frames since initial investment. Accounts with a zero balance at either the beginning or end of the time period shown will not calculate a personal rate of return and hence will show a zero return.
