Explanation of Terms

Basic Generation Service (BGS) - Generation charges for any consumer who has not chosen an electric generation supplier.
Customer Charge - Monthly charge that offsets costs for billing, meter reading, equipment, and service line maintenance.
Delivery Service Charges - Charges for the use of local wires, transformers, substations, metering, billing, other equipment, and other activities used to deliver electricity to consumers from high-voltage power lines.
Estimated Reading - On the months we do not read a meter, we calculate the bill based on past electrical usage.
Generation Charge - Charge for the production of electricity.
KWH (Kilowatt Hour) - A unit of measure for electricity usage equal to 1,000 watts used for one hour.
Late Payment Charge - A charge added to the bill on balances owed after the Due Date.
Multiplier - A number used in the calculation of kilowatt hours. The difference between meter readings is multiplied by this number to determine kilowatt hour usage or KWH/KVA.

Non-Utility Generation Charge - Charge (previously called the Market Transition Charge) that primarily recovers costs of BPU-approved power supply contracts. This charge includes the Transition Bond Charge, which JCP&L is collecting as servicer on behalf of JCP&L Transition Funding II LLC, which owns the Transition Bond Charge.
Payment Plan (Budget) - The Equal Payment Plan distributes costs more evenly over the year by billing an average amount each month.
Price to Compare - Price per kilowatt hour to be used when comparing to the price of a generation supplier.
Prorated Bill - If this is on your bill, the current billing period is for less than 26 days or more than 35 days or a rate change occurred during the current billing period.
Service Charge - Charge for opening an account.
Societal Benefits Charge (SBC) - Charge to recover costs of low-income assistance and weatherization, energy conservation programs, nuclear decommissioning, manufactured gas plant remediation, and consumer education on competition.

Explanation of Terms

Basic Generation Service (BGS) - Generation charges for any consumer who has not chosen an electric generation supplier.
Customer Charge - Monthly charge that offsets costs for billing, meter reading, equipment, and service line maintenance.
Delivery Service Charges - Charges for the use of local wires, transformers, substations, metering, billing, other equipment, and other activities used to deliver electricity to consumers from high-voltage power lines.
Estimated Reading - On the months we do not read a meter, we calculate the bill based on past electrical usage.
Generation Charge - Charge for the production of electricity.
KWH (Kilowatt Hour) - A unit of measure for electricity usage equal to 1,000 watts used for one hour.
Late Payment Charge - A charge added to the bill on balances owed after the Due Date.
Multiplier - A number used in the calculation of kilowatt hours. The difference between meter readings is multiplied by this number to determine kilowatt hour usage or KWH/KVA.

Non-Utility Generation Charge - Charge (previously called the Market Transition Charge) that primarily recovers costs of BPU-approved power supply contracts. This charge includes the Transition Bond Charge, which JCP&L is collecting as servicer on behalf of JCP&L Transition Funding II LLC, which owns the Transition Bond Charge.
Payment Plan (Budget) - The Equal Payment Plan distributes costs more evenly over the year by billing an average amount each month.
Price to Compare - Price per kilowatt hour to be used when comparing to the price of a generation supplier.
Prorated Bill - If this is on your bill, the current billing period is for less than 26 days or more than 35 days or a rate change occurred during the current billing period.
Service Charge - Charge for opening an account.
Societal Benefits Charge (SBC) - Charge to recover costs of low-income assistance and weatherization, energy conservation programs, nuclear decommissioning, manufactured gas plant remediation, and consumer education on competition.

For your safety and the safety of our crews, when using a generator follow the manufacturer's installation and operation instructions. Never connect a generator directly to your electrical system without an isolation device installed by an electrician. Otherwise, a fire could start or an employee restoring your power could be seriously injured. We suggest plugging lights/appliances in the outlets on the generator unit. Avoid the seasonal highs and lows in your electric bills by signing up for the Equal Payment Plan (EPP). While on this plan, each month you are billed one-twelfth of your estimated annual usage. Your account is reviewed periodically and adjusted, if necessary, to ensure your payment amount reflects your actual usage. If you are not already an EPP participant, but would like to enroll, call our Customer Service number, or visit www.firstenergycorp.com/paymentoptions .	Usage Information for Meter Number L32558637

Explanation of Terms

Basic Generation Service (BGS) - Generation charges for any consumer who has not chosen an electric generation supplier.
Customer Charge - Monthly charge that offsets costs for billing, meter reading, equipment, and service line maintenance.
Delivery Service Charges - Charges for the use of local wires, transformers, substations, metering, billing, other equipment, and other activities used to deliver electricity to consumers from high-voltage power lines.
Estimated Reading - On the months we do not read a meter, we calculate the bill based on past electrical usage.
Generation Charge - Charge for the production of electricity.
KWH (Kilowatt Hour) - A unit of measure for electricity usage equal to 1,000 watts used for one hour.
Late Payment Charge - A charge added to the bill on balances owed after the Due Date.
Multiplier - A number used in the calculation of kilowatt hours. The difference between meter readings is multiplied by this number to determine kilowatt hour usage or KWH/KVA.

Non-Utility Generation Charge - Charge (previously called the Market Transition Charge) that primarily recovers costs of BPU-approved power supply contracts. This charge includes the Transition Bond Charge, which JCP&L is collecting as servicer on behalf of JCP&L Transition Funding II LLC, which owns the Transition Bond Charge.
Payment Plan (Budget) - The Equal Payment Plan distributes costs more evenly over the year by billing an average amount each month.
Price to Compare - Price per kilowatt hour to be used when comparing to the price of a generation supplier.
Prorated Bill - If this is on your bill, the current billing period is for less than 26 days or more than 35 days or a rate change occurred during the current billing period.
Service Charge - Charge for opening an account.
Societal Benefits Charge (SBC) - Charge to recover costs of low-income assistance and weatherization, energy conservation programs, nuclear decommissioning, manufactured gas plant remediation, and consumer education on competition.
