Dear Homeowner:

Congratulations on the purchase of your new home. There is nothing better than owning a new home, especially one with solar power. You are now part of an exclusive club of homeowners bettering the environment and lowering your electric bill at the same time.

Pursuant to the Solar Purchase Agreement between you and Sunnova Energy Corporation, DBA SunStreet Energy Group, a Delaware Corporation, the price you paid for the solar system installed on your new home is **\$15,960.00**.

You may know that some buyers of a new home equipped with a solar electric system may qualify for certain tax credits. This letter contains important information. We suggest you provide this information to your tax advisor and keep a copy for your records.

To determine if you qualify for the credit, you should consult with your tax preparer to review your individual facts and circumstances.

We also want to let you know that you will be contacted by a SunStreet representative to facilitate the interconnection of the solar system with the local electric utility. Usually about 30 days after all interconnection paperwork is submitted to the utility, the utility approves the interconnection of your solar system. At such time, we will schedule an in-home orientation with you to activate your solar system. Please make sure you have already set up an account with your local utility and that you have a working Internet connection with a router.

We hope you enjoy your system!

Sunnova Energy Corporation, DBA SunStreet Energy Group, a Delaware Corporation, its dealers, affiliates or employees expressly make no guarantees or warranties as to whether the credit will be applicable or available. Sunnova does not guarantee the homeowner's qualification for the tax credit. Tax Credit is subject to eligibility requirements. Tax laws are subject to change. Not tax advice; homebuyers should consult with their tax advisor.
