Important information is located on the back of this real estate assessment notice.

General Information

Real estate assessments are made in compliance with accepted methods of the real estate assessment profession. For most residential properties, fair market value is best determined using comparable sales data. Properties that have recently sold are analyzed and adjustments are made for differences such as size, condition, age, location, and interior/exterior amenities. For most commercial and industrial properties, fair market value is best determined using the sales comparison or the income approach whereby the property's income stream is capitalized into an estimate of value. Replacement cost less depreciation is also used in assessing residential, commercial, and industrial properties.

Tax Calculation

To determine the tax bill, divide the assessed value by \$100 and multiply by the rate. For example, real estate taxes on property assessed at \$300,000, at a rate of \$1.0545 would be \$3,163.50 ($\$300,000/\$100 \times \1.0545).

Assessment Information

Real estate assessments are available online at www.pwcva.gov/realestate.

You have the right to view and make copies of records maintained by the Real Estate Assessments Office. The records that are available and the process for accessing them are described in Sections 58.1-3331 and 58.1-3332, VA Code Ann.

Section 58.1-3280, VA Code Ann., authorizes appraisers to physically examine real property in all cases where they deem it advisable. To ensure property descriptions are accurate, the County's assessors periodically inspect properties and verify existing data.
