 Greetings,

This email acts as the official permission to operate notice for this application: 05341154.

22656 E ROCKY TOP PL, AURORA, Arapahoe, Colorado, 80016-7936

For net metering systems, we wanted to let you know that the net and production meters (if applicable) have been installed at the premise. At this time, you may energize the system. If you are the installer, please notify your customer.

For community solar gardens, please refer to the formal PTO letter sent via email.

Please note: This may be a delayed notification for residential, single-phase solar systems. These systems receive conditional permission to operate on the same day as a passed witness test, which signals the time your system can be operational. If this is the case, our program team is just catching up administratively. We apologize for any confusion.

Thank you,
Xcel Energy
