Description: *****2763(/efile:Return/efile:ReturnHeader/efile:Filer/efile:SpouseSSN)

Error Detail:

Spouse SSN and Spouse Name Control in the return must match the e-File database.

Error Resolution:

The IRS rejected this return because the secondary taxpayer's Social Security number (SSN) and last name do not match IRS data received from the Social Security Administration (SSA).

Verify the secondary taxpayer's SSN and last name have been entered correctly and match their social security card. Make any corrections needed, then resubmit your return.

If the secondary taxpayer info you've already entered is correct, call the Social Security Administration (SSA) at (800) 772-1213 to verify that their records are accurate. If SSA records need to be updated, it can take up to four weeks for the IRS to receive this info. Wait four weeks, then refile the return.

If your return continues to be rejected, or if you do not want to wait four weeks to refile electronically, you may print and file by mail.

Note: If Social Security info is inaccurate and you do not call to correct it, your return will be rejected again next year.
