Your Personal Rate of Return

This Period **-7.4%**

Your Personal Rate of Return is calculated with a time-weighted formula, widely used by financial analysts to calculate investment earnings. It reflects the results of your investment selections as well as any activity in the plan account(s) shown. There are other Personal Rate of Return formulas used that may yield different results. Remember that past performance is no guarantee of future results.

Your Asset Allocation

Statement Period: 01/01/2018 to 12/31/2018

Your account is allocated among the asset classes specified above as of 12/31/2018. Percentages and totals may not be exact due to rounding.

The [Additional Fund Information](#) section lists the underlying allocation of your blended funds.

Market Value of Your Account

Statement Period: 01/01/2018 to 12/31/2018

This section displays the value of your account for the period, in both shares and dollars.

Remember that a dividend payment to fund shareholders reduces the share price of the fund, so a decrease in the share price for the statement period does not necessarily reflect lower fund performance.

*You have invested a portion of your account in Blended Funds. Blended Funds generally invest in a mixture of stocks, bonds and short-term investments, blending long-term growth from stocks with income from dividends and interest. Please refer to the [Additional Fund Information](#) section to see how your blended funds are allocated across the three asset classes.

Please refer to NetBenefits and other Plan information, such as your SPD, for a description of your right to direct investments under the Plan. For information on any plan restrictions or limitations on

those?rights visit NetBenefits and click on "Plan Information".

To help achieve long-term retirement security, you should give careful?consideration to the benefits of a well-balanced and diversified investment portfolio. Spreading your assets among different types of investments can help you achieve a favorable rate of return, while minimizing your overall risk of losing money. This is because market or other economic conditions that cause one category of assets, or one particular security, to perform very well often cause another asset category, or another particular security, to perform poorly. If you invest more than 20% of your retirement savings in any one company or industry,?your savings may not be properly diversified. Although diversification is not a guarantee against loss, it is an effective strategy to help you manage investment risk.

In deciding how to invest your retirement savings, you should take into account all of your assets, including any retirement savings outside?of the Plan. No single approach is right for everyone because, among?other factors, individuals have different financial goals, different time horizons for meeting their goals, and different tolerances for risk. It is also important to periodically review your investment portfolio, your investment objectives, and the investment options under the Plan to help ensure that your retirement savings will meet your retirement goals. Visit the Dept of Labor website www.dol.gov/agencies/ebsa/laws-and-regulations/laws/pension-protection-act/investing-and-diversification for information on individual investing and diversification.

Some of the administrative services performed for the Plan were underwritten from the total operating expenses of the Plan's investment options.
